General Application and Use Recommendations

RENU[®] Zinc 20 is generally compatible with fertilizer solutions. Proper timing, rate, and placement is important for desired results and highly dependent on stage of crop growth, soil fertility levels, and environmental conditions. Applications as broadcast treatments or row treatments are common and range from 1 to 4 quarts per acre. Always make a small-scale test (jar test) to assure compatibility in your material.

Handling and Storage

RENU[®] Zinc 20 should be stored in a cool, well-ventilated location in vented tanks out of direct sunlight. Avoid containers, piping, or fittings made of brass, bronze, or other copper bearing alloys. Spills from broken containers can be cleaned up with absorbing clay or other suitable materials. Avoid inhalation of vapors if possible. Avoid contact with skin and eyes. Wear proper protective equipment when handling. Dispose of used containers in accordance with local, state, and federal regulations. Keep out of reach of children.
